WORK EXPERIENCE

Independent Software Consultant Freelance

- Independent Software Consultant | 6 months | Jul 2025 - Present
- Designed and delivered digital service operations systems for an automotive service company, reducing manual operations and cutting delivery time by ~50% through AI-assisted development (Vibe Code) to accelerate delivery.

Bluebik Group Public Company Limited

- Project Manager | 3 months | Mar 2025 - Jun 2025
- Facilitated Agile ceremonies and removed technical delivery blockers across consulting teams, ensuring client delivery milestones were maintained and critical issues were resolved efficiently.

Smart Shift Solutions

Project Manager and Senior Full Stacks Developer | Jan 2020 - Feb 2025

- Smart Supply Chain Management System | Project Manager & Software Developer**
Developed and delivered an integrated ERP-based supply chain system, leading go-live execution and managing change requests by gathering requirements for continuous feature enhancements.
- Land Collateral Loan Platform | Project Manager & Software Developer**
Led the design and development of a CRM-driven loan origination platform enabling customers to submit loan requests online and supporting internal approval, document generation, and contract execution, reducing processing errors and significantly improving loan conversion rates.
- Logistics Management System | Project Coordinator**
Designed logistics system modules within an ERP-style platform to optimize truck load planning and delivery execution, reducing scheduling time and improving operational efficiency.
- HR Management System | Project Coordinator**
Coordinated delivery of an internal HR and sales operations system supporting attendance, leave management, and sales inventory workflows, acting as the primary client contact to improve delivery alignment and reduce rework.
- Home Service Operation System | Software Developer**
Implemented core features within a CRM-enabled home service platform to streamline contractor queue management and improve overall end-user experience.

Software Engineering | Apr 2018 - Jan 2020

- Construction Management System**
Developed an enterprise construction management web application integrating certificate, collateral, and approval workflows, improving project oversight and operational transparency for a real estate organization.

Junior Programmer | May 2014 - Mar 2015

- Procurement Management**
Developed web-based procurement tools to standardize supplier sourcing data and support factory production planning.
